

Para calcular la mitad de un número seguimos estos pasos:

1. Descomponemos el número:

$$286 = 200 + 80 + 6$$

2. Hallamos la mitad de cada sumando:

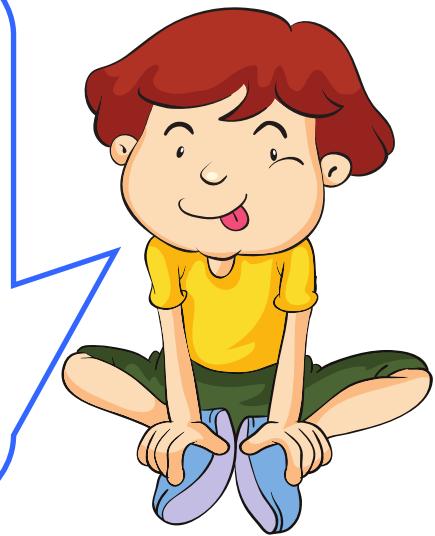

$$200 : 2 = 100$$

$$80 : 2 = 40$$

$$6 : 2 = 3$$

3. Componemos el número:

$$100 + 40 + 3 = 143$$

$$286 = \frac{200}{2} + \frac{80}{2} + \frac{6}{2} = 100 + 40 + 3 = 143$$

¡Ahora te toca a ti!

$$468 = \frac{\underline{\hspace{2cm}}}{2} + \frac{\underline{\hspace{2cm}}}{2} + \frac{\underline{\hspace{2cm}}}{2} = \underline{\hspace{2cm}} + \underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$642 = \frac{\underline{\hspace{2cm}}}{2} + \frac{\underline{\hspace{2cm}}}{2} + \frac{\underline{\hspace{2cm}}}{2} = \underline{\hspace{2cm}} + \underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$846 = \frac{\underline{\hspace{2cm}}}{2} + \frac{\underline{\hspace{2cm}}}{2} + \frac{\underline{\hspace{2cm}}}{2} = \underline{\hspace{2cm}} + \underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$1628 = \frac{\underline{\hspace{2cm}}}{2} + \frac{\underline{\hspace{2cm}}}{2} + \frac{\underline{\hspace{2cm}}}{2} = \underline{\hspace{2cm}} + \underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$6208 = \frac{\underline{\hspace{2cm}}}{2} + \frac{\underline{\hspace{2cm}}}{2} + \frac{\underline{\hspace{2cm}}}{2} = \underline{\hspace{2cm}} + \underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$
